## Ratepayers Vote For Retention of 1937 Assessment

150 Appeals Listed Against Revised Assessment—Trustees State They Will Proceed With Appeals.

The attitude of ratepayers at Wednesday's meeting indicated that school expenditures will be carefully watched to avoid further taxation increases. For teaching purposes alone in the high school it is figured that the cost per pupil is \$90 per annum, (high school salaries being \$9,010 per annum) to which must be added the overhead cost of the accommodation and maintenance, supplies, etc. Basing the average number of high school pupils in a year at 100, it cost the ratepayers approximately \$100 per year for each high school pupil. Next year the cost will be reduced by one less high school teacher being employed. Undoubtedly closer control will be demanded over expenditures after Wednesday's protest meeting.

The court of revision to hear appeals against the revised assessment of the school district opened Monday evening, but only one appeal was heard when it became evident that impatient ratepayers numbering over one hundred required an explanation of the increase in taxes. There were 150 appeals filed.

The trustees adjourned the court and with the assessor, J. W. Chapman, of Edmonton, addressed the ratepayers in the school auditorium. Questions concerning the assessment were asked by individuals and the assessor stated he appraised the properties on what he considered a fair valuation.

Many, however, were not satisfied with the valuation basis, and as a result a motion was carried that a ratepayers meeting be called on the first day of the mines were idle. This was on Wednesday, and at 7 p.m. about two hundred met and appointed W. H. Hayson as chairman, and Miss Lees as secretary of the meeting; the trustees with the exception of P. Sharp being present.

Many complaints were made, J. Atkinson speaking repeatedly and making a motion that if necessary the mill rate be raised to secure the amount of money required by the board. Much discussion followed, many passing remarks back and forth. G. Kellock, general manager of the mining companies, stated the company's stand on the revised assessment, stating that the assessment they had paid taxes on property which did not even exist, and therefore he had pressed for a revised assessment. Machinery which had become obsolete had been allowed to stand on the assessment roll.

After about two hours of discussion Chairman Hayson put the motion to

the meeting. The actual count was not secured, but a majority voted for it.

The trustees claim that the meeting was not called in accordance with the ordinance, and that they have no alternative but to go forward with the court of appeal. It was reported last evening that they would notify about twenty appellants to appear each evening until all appeals have been heard.

Those not satisfied with the ruling of the court will have the further right to appeal either to the district court or the director of assessments, according to all appeals have been heard.

John Salvador suggested that a committee of five sensible men be appointed from the meeting to sit with the court of revision. Someone asked where they could be found, and a roar of laughter. Not making a motion, John's suggestion was not voted on, though some favored it.

## Lovely Waterton Attracts Visitors

Beauties of National Park Enjoyed by Many From Coleman Over Week-End.

Beautiful holiday-like weather was taken advantage of by car-warmers to go to the various beauty spots in the mountains on Sunday. Waterton of course had its quota, the improved condition of the highway from Pincher Creek to the park being an added inducement to travel that way.

The golf course there has been increased from nine to eighteen holes, which will prove an added attraction for players.

A new hotel has been built by a Mrs. Kemmis, and reconstruction has commenced the large pavilion destroyed by fire during the winter. The Prince of Wales hotel was opened for the season on June 15. With favorable weather Waterton should have a large quota of visitors from the United States and Canada. Combined with its natural attractions is the added interest of it being an International peace park, dedicated two years ago when impressive ceremonies were taken part in by representatives of the two nations.

For the past number of years it seems to have been the habit of younger visitors to Waterton to leave their names prominently displayed all over the various kitchens placed at the disposal of visitors. On Sunday last were seen names of Colemanites, some who have died, others who have left Coleman and who still remain here. Names seen were Dulcie Richards and Marj. Halliwell, May 26, 1928; Marion Burrell, July 1, 1930; Maisie Gillespie, July 1, 1930. There were scores of others too numerous to mention, many of them lacking the dates when placed there.

Mrs. William Dower and five-year-old daughter Alice are here from New Jersey, at the home of Mrs. Dower's parents, Mr. and Mrs. William Antroub.

## Open Verdict by Jury on Death of Glendenning

Police Have No Further Evidence to Indicate Who Fired Fatal Shot.

The verdict at the adjourned inquest on the death of Robert James Glendenning was:

That he came to his death at 9:05 p.m. on May 28, at the rear of Joe Jenkins' residence in West Coleman, death resulting from hemorrhage of the lungs, caused by a bullet wound from a .22 calibre rifle in the hands of a person at present unknown.

We suggest that the regulations governing discharge of firearms within town limits be strictly enforced. Further, that the age limit for use of firearms, including .22 rifles, should be raised, and that all firearms should be registered. We also suggest the danger resulting from careless shooting might be reduced by owners of land in the vicinity of town prohibiting all shooting on their property within a distance of two miles from town limits.

Sergeant Casway, R.C.M.P., stated no further evidence had been secured from investigation or rifle tests to throw any light on the tragedy. 195 rifles have been examined, and further tests are being made by a ballistics expert at Regina.

A juror asked Sergeant Casway if there was any reason known to the police why Joe Jenkins was alongside Glendenning when he was shot, should have stated at the inquest on June 7, that he thought it was an intentional shot and that deceased had been murdered.

The sergeant replied that every avenue which even gave the slightest hint of a motive for intentional shooting had been tracked down and he believed there was no motive whatsoever.

Mr. Glendenning, father of the deceased, stated he appreciated the fact that the police had done everything within their power to find who had fired the shot, and commended them for their painstaking efforts.

## Antiques Display Proved Interesting

The tea and display of antiques and curios arranged by the Young Women's Auxiliary of the United Church on Saturday afternoon attracted many people. The antiques were loaned by various people, and included a most varied assortment of dresses of the long, long ago, one with an 18-inch waist line, worn in the days when the ladies wore stays to make them appear slim and big bustles to add to the charm of femininity. Such aids to the well-dressed woman of those days have long since been discarded. Instead of "ratts" in the hair to add to a woman's crowning glory, bobbed hair and permanents have taken their place.

There was a clock reputed to be 300 years old, with a crank to wind it almost as large as the old Ford automobile cranks; a pewter pot 150 years old from which the old-timers likely drank home brew; "the old spinning wheel in the parlor" was loaned by Mrs. Andrew MacLeod; Mrs. W. Bell loaned a tapestry cover in a remarkable state of preservation, it being over 100 years old; copper tea kettles, old paintings, a copy of The Chronicle and Times 151 years old, published in London, and the print of which can quite easily be read, and many other relics. It was a peep into the past, most interesting and furnishing a topic of conversation on "what they did when we were young."

HUSBAND, WIFE TAKEN WITHIN THREE WEEKS  
Just three weeks after the death of her husband, Joseph, Mrs. Hannah Elizabeth Brown Purvis, 69, of 2212 Twenty-fifth street west, died yesterday morning at the family residence. She had lived in Calgary for the past twenty years.

She is survived by three sons: Walter, Coleman; Joseph and Thomas, Calgary; five sisters, Mrs. J. Cawthra, Calgary, and the others in England; two brothers in England and three grandchildren.

Funeral services, conducted by Ven. Archdeacon C. Swanson, D.D., will be held at Jacques' Funeral Home tomorrow at 2 p.m. Interment will be in the family plot at Burslem cemetery—Calgary Herald.

## Many Attend Funeral of Miss Farano

The funeral of Miss Nellie Farano yesterday afternoon was attended by a large number of members of the Italian society and friends. Headed by the citizens band and the flag of the Italian society and the Canadian flag, the procession proceeded from the home in Second street to the Holy Ghost church, the service being conducted by Rev. J. T. Dunbar. Burial was in the Catholic cemetery. Many from the Pass towns were present.

## Coleman Elks Awarded Community Service Trophy

For the second year in succession, Coleman Lodge, B. P. O. E., has been awarded the trophy for the best community service during the year. The cup was first put up for annual competition in 1934, and has been won by Lethbridge, Okotoks, Olds and Coleman.

Members of Coleman Lodge present at the annual convention in Edmonton last week to receive the presentation were J. M. Chalmers, secretary of the local lodge, and Henry Tiberghien. The Edmonton dailies gave splendid publicity to the gathering, its front page on the opening day over-printed with the Elks emblem in the colors of the organization. Many photographs of the prominent members of the order in Alberta were also carried. Coleman Lodge received its share of credit for its record throughout the year.

## Many Guns Examined By Police

Up till last Saturday 195 guns had been taken up by the police for examination and tests in an effort to discover the gun from which was fired the bullet that killed Bobby Glendenning on the night of May 28.

There are still many houses to be visited to collect Winchester rifles, that being the type of rifle from which the bullet was fired. The large number of guns owned in the town makes it remarkable that there have not been more accidents, as many of the young-er lads not being familiar with the hazards of rifle shooting in populated areas or in the woods where others may be moving in the vicinity of their shooting, might easily cause injury or death to others.

There must be sufficient rifles in the hands of the Coleman people to arm an entire company of infantry. Greater restrictions are certainly essential in allowing possession and the use of firearms. They are dangerous weapons, and it is dangerous that so many are used by inexperienced persons.

THE UNITED CHURCH  
The congregation is reminded that the Sacrament of the Lord's Supper will be administered at the morning service.

C. J. HOLE BURIED  
Funeral services were held yesterday from the Mennonite church at Duchess for Christian John Hole, who died in the Bassano hospital last Thursday. Mr. Hole was born in Gudbrandsdal, Norway, in 1869 and came to Minnesota with his parents 10 years later. In 1910 he moved to Alberta, where he had resided since.

He is survived by his wife, one son, five daughters and one brother—Calgary Herald. Mr. John A. McBurney is a daughter and left last week on receipt of the news of the serious illness of her father.

## Town Council Notes

All members with exception of Councillor Plante were present at Tuesday's meeting. Routine business occupied the attention of the members, including street lighting, relief cases, street improvements, etc.

Accounts passed for various purposes totalled \$603.05.

Mayor Pattinson is attending the convention of urban municipalities in Calgary.

## Many Attend Legion Carnival

The Legion carnival brought many people to Coleman on Saturday and Monday, and Charlie Huit of Calgary was assisting the members in putting over another successful money-raising event. Major prizes went to Fernie and Bellevue. The Legion executive thanks all who assisted.

## Doctors Hand In Resignation

Resignations of Dr. Borden and Dr. MacLean have been handed to the hospital board, to take effect on July 15. Dr. Borden will take up practice in Penitiction, B. C., and Dr. Sweeney will accompany him. Dr. MacLean will go to Harvard Medical College in Boston for a post-graduate course.

Dr. Borden has been here since 1926, in which year he was appointed by the hospital board. During that time he has taken an active interest in community affairs. Mrs. Borden has rendered invaluable service as divisional commissioner of the Girl Guides, and her removal will leave a gap which will be hard to fill.

## Foss Boulton Seeks Admittance To Royal Air Force

Foss Boulton, son of Mr. and Mrs. J. H. Boulton, returned to his home recently after a year's training at an aviation school at the Pacific coast.

Leaving Coleman last July, Foss has trained faithfully in the mechanical department as well as studying theory and doing practical work in the field of flying. On May 5 he was allowed to solo and claims two hours solo experience to his credit. He has made application for admittance into the Royal Air Force, London, and with the experience gained during the past year confidently awaits a favorable reply.

NOT GUILTY, SAYS JOE  
When the house in which Dave Gillespie now lives was built, the original purchaser of the land built it on the avenue instead of the lot. That was some years ago. With later developments and demand for lots, the error was discovered. It looked as if Dave would have to move his house. But an amicable solution was arrived at between the town and Dave. The Journal stated that the error was made by the agent of the original proprietor of the subdivision, who happened to be Joe Stevenson. Joe told The Journal it was not his error, because he pointed out at the time that the party who was building was on the right piece of land. In justice to Joe, we therefore, absolve him of any error after his explanation of the incident.

ST. ALBAN'S CHURCH  
First Sunday after Trinity, Matins at 11 a.m., Sunday school 2:30 p.m. The fourth centenary of the English Bible will be observed on Sunday. There have been many great translators of the bible into English. Caldon, Venerable Bede, Alfred the Great, John Wycliffe, William Tyndale and Miles Coverdale. It was in 1525 when William Tyndale finished the first complete New Testament in English from the original Greek. The sermon subject will be: "What is the Bible?" You will be made welcome.

Mrs. W. J. Bartlett, of Blairmore, has been seriously ill during the past week. Her speedy recovery is hoped for by her friends.

Peter Sharp has been visiting friends at Lethbridge during the past week.

## Caledonians Honor Rev. and Mrs. A.E. Larke At Banquet

Members of Coleman Caledonian Society and their friends at a supper and social evening in the I.O.O.F. hall on Friday evening, bade farewell to Rev. and Mrs. A. E. Larke, of Blairmore. Mr. Larke, minister of Central United church, will move with his family at the end of the month to his new charge at Macleod.

Mrs. William Roughhead, president of Coleman society, welcomed the gathering. She then asked Mr. Dave Gillespie, the society's first president, to take the chair.

He expressed his regret and that of the society's at the loss of Mr. Larke, who had been invaluable in his assistance. He was one of the organizers in 1931 and by his enthusiasm and organizing ability Coleman Caledonian Society was formed and has flourished.

Mr. Larke was held in high esteem by all and especially by the society, for which he has done much. Mr. Gillespie stated if old members really wanted to show their appreciation of Mr. Larke's efforts in their behalf they could make it a point to regularly attend the meetings from now on and make the society more successful and enjoyable.

Selections on the program included James Moore with two bag pipe selections; Miss Mamie McLellan sang "Danny Boy" and "Hallel Laddie"; Mrs. Robert Holmes, recitations, "How to Manage a Husband" and "The Right to Change Her Mind"; John Anderson, sr. played a medley of Scottish selections on the accordion. Mrs. A. Larke sang "I Love a Lassie" and "Comin' Thru' The Rye"; Jessie McCulloch gave a violin solo entitled "The Doll's Dance"; Mr. Larke sang "Guid, For Gae Me For Lein" and with Mrs. Larke sang "The Crooked Babbee"; Mrs. John Anderson gave a recitation "Next Stop Kircaldy"; Katherine McLellan sang "Rest Thou" and "There's a Bower of Roses by Bendimere Stream."

Mrs. W. H. Garner, on behalf of the society presented Mrs. Larke with a purse, wishing her success and happiness in her new home.

In response Mrs. Larke stated the honor bestowed upon herself and husband was truly unexpected and thanked members for their kindness. She extended an invitation to visit them whenever they might be in Macleod.

Mr. Geo. Kellock, remarked he had attended many Burns' nights sponsored by the local society and usually the first man he would see upon entering the banquet room would be Mr. Larke, jauntily wearing a Scots' tammy, and taking a major part in the program. While the guest of honor was leaving the Pass he did not think Macleod too far away that it should prevent the society from seeking Mr. Larke's services at future Burns' nights. In conclusion he wished Mr. Larke success and happiness in Macleod and on behalf of the society presented him with a set of brushes.

Mr. Larke responded, voicing his gratitude for the kindness shown him during the evening. In 1931 in co-operation with a number of ardent Scots he had organized the present society

## The Curse Of Education

"The best things in life are not given a percentage."

The foregoing is just a small extract from a speech made to a class of graduating Normal School students by Dr. J. S. Thomson, president of the University of Saskatchewan, to give point to a protest which he uttered against the school system of examinations as it exists in Canada and which he appropriately described as "a curse".

It is indeed gratifying to find leaders of education in the Western provinces voicing such a viewpoint on the inelastic method of categorizing school students—of pigeon-holing them under valuations elicited as a result of the application of a rule-of-thumb system of examinations.

As Dr. Thomson said: The grading of A's, B's and C's, and this multiplication of credits until students don't know where they are, "leaves so little place for all the noble things in life that can never be put in terms of percentage."

While the press report of Dr. Thomson's address did not enumerate those nobler things towards which the student mind should be guided, it is not difficult to enumerate them and they can all be incorporated in the single-term "good citizenship," provided the definition of that phrase is made to include all that it should designate.

### Good Citizenship

And good citizenship means much more than interest in government, in community affairs, in neighborhood welfare and the like. It involves the development of good sportsmanship, unselfish interest in the welfare of others and the will to recognize and place human values above material considerations and the advancement of moral and spiritual welfare.

It is because these things are, and should be, the ultimate goal of the educational system that the personality and character of the teacher should be the ranking qualification; for, as the teacher is, and not as the teacher says, so will the pupil be during the formative years of the child's career. The teacher is destined to implant an unconscious and ineradicable mark on the mind of the impressionable youth under his or her care.

The value of the teacher to the children, to the community and the nation should be measured in terms of character and integrity rather than in brilliance of erudition. A teacher of strong individuality and mediocre academic attainments is worth immeasurably more to the future generation than one who is superlatively clever but lacks the attributes which inspire respect and admiration. The teacher who combines both is a jewel indeed and for such, adequate compensation cannot be measured in dollars and cents.

In the tuition of those things which as Dr. Thomson says; cannot be registered in percentages, an ounce of practice is worth a ton of precept, to paraphrase a time-honored saying. The teacher who renders only lip service to the nobler things of life is not worth his or her salt when the yardstick of real values is applied, but the teacher who is a living example of the aspirations which he or she holds up to the pupils as the lodestars of their careers is a pearl of great price.

While the teacher may have to conform, through regulatory control, to the examination system in greater or less degree, he or she will perform his or her greatest and most valuable work when moulding children into future citizens with ambitions to reach for the highest and best that life can give, not in material terms, but in the moral and spiritual realms, and this can only be done by the influence of example.

### A Permanent Influence

The teacher who plays the game of life on the basis of the highest rules will exert an unconscious influence for good on his or her charges that will never be extinguished throughout life, and fortunate, indeed, is the child whose future destiny is placed in such competent and reliable hands.

Nor will that impelling force die with the passing of the teachers' charges. It will be passed on from generation to generation. Like the ripple made in the water by the cast of a stone, the impulse surging through the ether from a radio transmitter, no one may say how far it will go or measure the extent of its ultimate effect.

The teachers about to embark on their difficult and highly responsible task of laying the foundation for a new and better nationhood were urged by Dr. Thomson to set before themselves three standards, or, as he called them, "attitudes of life": the absolute worth of the individual human being, the building of character, and the value of citizenship, and pointed out the importance of selflessness with the appropriate comment that "the way to be unhappy is to fall in love with yourself."

Excellent advice which, if it falls on receptive ground, is bound to yield rich dividends to the country in the future.

### Yields Another Treasure

Gold Coins In House

Paris Wrecking Crews Find More

The old house at 53 Rue Mouffat, Paris, where wrecking crews found a \$90,000 treasure in gold Louis, has yielded another and richer hidden hoard.

Workmen broke down a new section of wall and brought to light leather and cloth bags packed with ancient gold pieces. Although an estimate of the worth of the new find was not immediately available, officials said it was greater than \$90,000.

The currency found first had been willed by Louis Nivelle, King Louis' equerry, to his niece, Anne Louise Claude Nivelle, according to the testimonial document found then.

## Not Good Publicity

Successes In Canada Not Stressed

As Much As Failures

"Canada," said Lord Tweedsmuir to the visiting Scottish farmers the other day, "gets rotten publicity: too much for the failures and too little for the successes." There is much truth in that remark, states the Ottawa Journal.

The world hears about our Western drought, the problem of our railways, but much less about our social accomplishments. Perhaps the world does not realize that this small population in half a century has made a nation out of scattered settlements, has made a good start in the development of rich natural resources, is one of the foremost trading countries on earth. Sometimes in the face of immediate difficulties we fail to bear these facts in mind even among ourselves.

The trouble is that our accomplishments go into the blue books, but our difficulties are news, and our successes are not sufficiently understood abroad. Perhaps it isn't news, but it is a fact of first importance that alongside an English-speaking nation of 130 millions we have preserved and developed a British country, solidly devoted to the British tradition. The progress of agriculture, of industry, of mining may not be news, as drought is news, but that progress has been a vital factor in world history of the past half century.

There isn't much we can do in the matter, of course. We shall just have to carry on in the knowledge that even in the United States many people still believe Canada a place of perpetual ice and snow inhabited mainly by Eskimos and Mounted Police, but we need have no inferiority complex on that account.

## Prime Ministers

Sixteen Ministers And Eleven Premiers In Canada Since Confederation

During the 71 years since Confederation there have been 16 Ministers and there have been 11 Prime Ministers in Canada. In the 34 years up to 1901, there were seven Prime Ministers and in the 37 since then, only four have been added to the list says "Canada's Weekly."

The most frequent changes in Premiership came after the death of Sir John A. Macdonald in 1891. Between that year and 1909 there were five new Prime Ministers—Sir John Abbott, Sir John Thompson, Sir Mackenzie Bowell, Sir Charles Tupper and Sir Wilfrid Laurier.

Sir John Macdonald was leader of the government for about 19 years, the longest period, but Sir Wilfrid Laurier, leader for 15 years, had the longest unbroken term. Sir Charles Tupper had the shortest term, only two months and one week. Sir Robert Borden was in office for eight years and 10 months. Mr. Mackenzie King, the present head of the government, has been Prime Minister for about 11 years.

All Mr. Meighen's predecessors, except Alexander Mackenzie, were given titles. Sir Charles Tupper received a baronetcy. The widow of Sir John Macdonald was created a baroness. Messrs. Arthur Meighen, W. L. Mackenzie King and R. B. Bennett have remained untitled.

## Checking Aliens

Scotland Yard Searching For Aliens Residing In United Kingdom

The special branch of Scotland Yard, co-operating with the Home Office, has launched a thorough check of aliens residing in the United Kingdom, who are estimated to number about 200,000.

Officers are questioning an average of 50 a day and have found many for whom they were searching came to the country last year for the Coronation, renewed their visas last November and have neglected to renew them again.

Immigration officials also are keeping a closer watch for aliens entering at British ports.

Two of the eggs were bad, and the lady had taken them back to the shop.

"That's all right, mum," said the grocer's boy, "You didn't need to bring them back. Your word is just as good as the eggs."

## Refugees From Austria

Seeking Countries That Promise Toleration And Freedom

With refugees pouring out of Germany and particularly from Austria, the League of Nations refugee office in London is redoubling its efforts to gain entry for them into countries whose institutions promise toleration and freedom.

Australia has just signed an agreement accepting 500 annually and the Canadian government soon will be approached to make at least an equal contribution towards a solution of this problem.

Most of the refugees are Jews, although 20 per cent are Christian.

The German Jewish aid committee, on behalf of the Orthodox Jews, has raised a large fund guaranteeing the Australian government that none of the settlers will become public charges for five years. A similar guarantee will be given the Canadian government. It was learned, if the immigration regulations will be relaxed to the extent of permitting entry for 500 annually. The British government is accepting thousands of refugees without guarantee.

Oxford has awarded two of our major chairs and other universities are eagerly seeking the services of outstanding scholars and scientists among the refugees.

## SELECTED RECIPES

LIGHTNING LAYER CAKE

(Two Eggs)

3 cups sifted Swans Down Cake Flour

3 teaspoons Calumet Baking Powder

1/4 teaspoon salt

1 1/2 cups sugar

1/2 cup softened butter or other fat

2 eggs, well beaten

1 cup milk

1 teaspoon vanilla

Sift flour, once, measure, add baking powder, salt, and sugar, and sift together three times. Add butter. Combine eggs, milk, and vanilla, and add to flour mixture, stirring until all flour is dampened. Then beat vigorously one minute. Bake in two greased 9-inch layer pans in moderate oven (375 degrees F.) 25 minutes. Spread Soft Mocha Frosting between layer and on top of cake.

Soft Mocha Frosting

4 1/2 tablespoons butter

4 1/2 tablespoons strong coffee

3 cups sifted confectioners' sugar

Dash of salt

1 teaspoon vanilla

Add butter to coffee and heat just to boiling. At once pour over sugar, stirring until sugar is dissolved. Add salt and vanilla. Beat until smooth and of right consistency to spread. Makes enough frosting to cover tops of two 8-inch layers, tops and sides of two 8-inch layers, or top and sides of 8 x 8 x 2-inch cake.

## Made To Order

Research Engineer Explains How Synthetic Moonlight Is Produced

Synthetic moonlight which can be produced in the parlor by the flick of a switch appeared as a great boon for love making.

Aubrey E. Noble of Buffalo, research engineer in gas tube lighting, explained it's all done with gas tube lighting. Silvery-blue rays of moonlight are produced by switches on all the colors except blue in synthetic daylight.

Synthetic daylight has been used with success by florists in New York. For housewives who like color in their home the engineers have worked out a plan which combines the use of a mercury lamp with fluorescent crystal paint. The walls are painted with fluorescent crystals and rays from the invisible lamp give a brilliant colored effect.

## To Avoid Collisions

Civil aircraft operators have been warned against jockeying over London at night, or in fact flying within 20 miles of Westminster bridge between sunset and 2 a.m. at altitudes between 3,000 and 11,000 feet to avoid collisions during manoeuvres.

A new ordnance map of the county of Surrey, England, with a scale of 25 inches to the mile, shows every building more than 10 feet square.

## Must Serve Seven Years

Before R.C.M.P. Constables Are Given Permission To Marry

Reports from western Canada that some Royal Canadian Mounted Police constables are resigning because of new marriage regulations could not be confirmed at Ottawa, although officers of the force said it is possible some are leaving for that reason.

After Col. S. T. Wood took command of the force last winter he increased from five to seven years the time a constable must serve before he is given permission to marry. In the early days of the force a man had to serve 12 years before he could marry and this was gradually reduced. Sir James MacBrien, who preceded Col. Wood, reduced it from seven to five years.

The increase back to seven years was made because it was considered the proportion of married men among the constables was too large and affected mobility of the force. It also increased expenses. When a constable is transferred there is the expense of moving his family. Married men also draw double rations and are allowed additional pay to cover separate living quarters.

Constables who have been four years in the force when the seven-year regulation came into effect will be granted permission to marry when their five years are up, but those who have only one or two years' service will have to wait until they have been in the force seven years.

## Pacification Moves Of Illusory Character, Says Anthony Eden

Leamington, Eng.—Anthony Eden Saturday told his electorate here that European appeasement must not be obtained through a sacrifice of Great Britain's vital interests. He called for a gigantic, united national effort "sufficient to show those nations which still believe in power politics that force is a weapon that can not profit its users."

Directly contrasting Prime Minister Chamberlain's foreign policies, over which he resigned as foreign minister earlier in the year, Mr. Eden described the wide pacification moves launched by the government as being of an illusory character, based on a policy of "concession to violence."

No one could contest Great Britain's sincerity in its desire for permanent peace in Europe, he said. But this peace should not be obtained through discarding Great Britain's national reputation, its vital interests or its sense of justice and equity.

"If appeasement were to mean what it is said it must mean," Mr. Eden declared, "it must not be at the expense of either our vital interests, our national reputation or our sense of fair dealing. Appeasement will be neither real nor lasting at such a price."

It would merely make real appeasement more difficult at a later stage. There must always be a point at which a nation must make a stand, "and we must clearly make a stand when not to do so would forfeit our self respect and the respect of others. That is the only sure guide in private or public relations," the former secretary said.

"You may gain temporary appeasement by a policy of concession to violence but you would not gain lasting peace that way. It is a grave delusion to suppose that you can."

"Even more untrue is it to suggest that those who would have wished to see our country take a flimsy stand in the last six months on behalf of the principle of good faith in international relations would thereby have plunged this country into war."

"The very reverse is the truth. The Nyon agreement to suppress piracy in the Mediterranean last September was an instance of firm and timely action by this country which contributed to avert the danger of war. Nor was the Nyon the only instance in our history. The great is not always the path to peace."

"Our greatest interest," Mr. Eden continued, "is the preservation of peace, but the more general the respect of international engagements the greater the danger to peace."

The speaker declared there were some who were prepared to take an optimistic view of the international situation.

"Such optimism," he stated, "is I am convinced, unfounded. The signs of the times are only too easy to read. If we are to avoid a catastrophe it can only be by a gigantic and united national effort sufficient to show those nations which still believe in power politics that force is a weapon which can not profit its users. To talk of democratic Britain as decadent, as is so often done in certain foreign countries, is to make

a mistake that has too often been made before.

"Britain has never been less decadent than she is to-day."

### Drouth In Europe

**Agricultural Situation Alarming States Chicago Business Man**

New York.—A drouth "worse than any in 100 years," combined with unseasonable frosts, insect pests and plant and domestic animal diseases, has created a "very alarming" agricultural situation in Europe, Howard D. Salins of Chicago, managing director of the Flax and Fibre Institute of America, said.

He returned from a two-month trip abroad during which he made an agricultural survey for the institute.

Salins said that the European farming picture had become so "amazing" in the last two months that if the United States had the agricultural products to send abroad "our farmers would be on a high plane of prosperity."

"In Europe, including Great Britain, they have been faced with a drouth worse than in 100 years," he said. "There isn't a country that hasn't been hit quite hard."

The drouth began in March and was almost continuous until the middle of May, he said, and there were frosts into June, nipping what crops had begun above ground. He also said farm animals had suffered serious epidemics of hoof and mouth disease.

"Italy agriculturally is in a deplorable condition," he said. "Russia has been hit. Germany has had not only drouth, but such heat that fires have burned crops. The potato crop in Ireland has been ruined. The five-year plans of the dictatorships have been ruined."

Salins added that "sources like Argentina, Australia and New Zealand have also been hit. New Zealand has a 90-day drouth—the worst in her history," and that this made the world agricultural situation worse.

### To Assist Education

**Workers' Association In Toronto Receives Grant Of \$5,000**

Ottawa.—A grant of \$5,000 to the Workers' Educational Association, Toronto, "to assist its Dominion-wide efforts in providing during the fiscal year 1938-39, educational classes for laboring men and women in various centres" is authorized by an order-in-council tabled in the House of Commons. The grant is made under the provisions of the Unemployment and Agricultural Assistance Act.

### Volcano Active

Manila.—Smoke and flames shot from Mayon volcano with greater violence, terrorizing the populace of Albay province and causing the death of one man through fright. The six-day eruption of the 7,900-foot peak mounted in intensity, causing fear the climax of the volcano's activity was yet to come.

## Chinese Leader Asks Powers To Fulfill Treaty Obligations

Shanghai.—General Chiang Kai-shek, leader of war-torn China, called upon friendly powers "to fulfill their treaty obligations by giving China positive assistance."

Chiang made the plea in a formal statement issued at Hankow, provisional Chinese capital, as his people fled before the invading Japanese, evacuating their homes in three cities in one of the greatest mass exoduses in recent history.

"While Chiang declared China still in confident of ultimate victory," he asked all friendly nations to aid China by economic sanctions, arms embargoes and trade boycotts against Japan, specifically recalling resolutions adopted by the League of Nations in support of China.

Roads were black with slowly plodding refugees fleeing Chungking, strategic Honan province railway junction, while civilians also fled from Hankow, south of the Yangtze river, and Canton, big port of south China.

Prepared to blast out what Chinese

forces remain in Chungchow, the Japanese hauled field artillery as they maintained a steady plane bombing of the area.

Twenty-one foreigners, including a number of missionaries, remained in Chungchow, from which the main Chinese defenses have been withdrawn.

Washington.—A stern demand by the United States government that Japan stop bombing non-combatant property in China drew an approving statement from Senator Norris (Ind., Nebraska).

Norris suggested the possibility of cutting off American cargo shipments to the Orient in an effort to curb aerial attacks and "slaughter of innocent persons."

The request for an end to attacks on non-military objectives was handed to Japanese officials at Tokyo by Joseph Grew, United States ambassador. The state department had instructed him to call the Japanese government's attention to a recent attack on the campus of the American-endowed University of Lingnan.

### King's Birthday Honors

**Sir Josiah Stamp, British Economist, Raised To Peerage**

London.—Sir Josiah Stamp, the noted economist, who investigated Canadian trading in grain figures in 1931, was raised to the peerage in the King's birthday honors list, which created two viscounts and two barons. The King also conferred the rare and coveted Order of Merit on the distinguished scientist, Sir Arthur Eddington. The order is limited to 24 and is conferred chiefly on scientists and men of letters.

The King celebrated his birthday June 9, although actually the anniversary of his birth falls in December.

The new viscounts: Baron Stonehaven, former chairman of the Conservative party organization.

Baron Weir, former member of the air council, who resigned his position as adviser to the air ministry last month at the time of Viscount Swinton's resignation as air secretary.

The new barons: Vivian H. Smith, chairman of the city of London Conservative organization.

Sir Josiah Stamp, the economist, who headed the grain futures inquiry in Canada in 1931.

Other honors included: Sir Donald Somerville, attorney-general, becomes a privy councillor.

Lewis R. MacGregor, Australian trade commissioner in Canada, becomes a Commander of the Order of the British Empire.

### Bombs Worry France

**Era Of Forbearance Is Past, Says French Premier**

Paris.—The era of "forbearance" is past. Border defenses will fire upon any plane attempting to cross the Franco-Spanish frontier, Premier Edouard Daladier told the chamber of deputies. He stated the identity of nine planes which bombed AX-Les-Thermes, France, had not yet been determined.

"Anti-aircraft defence batteries and other military weapons heretofore were only firing warning shots or signals," he said. "Hereafter they are to open fire as soon as a plane crosses the French frontier," regardless of its nationality.

Daladier said an entire pursuit squadron was based near the frontier and is in constant patrol.

Fragments of the 26 bombs dropped by the "mystery" squadron of nine planes between the viaduct and village of Orgex are being carefully examined by government experts. Daladier said, intimating their findings may have "grave consequences."

### Taking Over New Duties

**Winnipeg Newspaper Man To Become Editor Of Vancouver Paper**

Vancouver.—W. L. MacTavish, editor-in-chief of the Winnipeg Tribune for the past 15 years, will become editor-in-chief of the Vancouver Daily Province, the latter newspaper announced. He will take over his new duties early in July.

Mr. MacTavish has spent his newspaper career in western Canada. In addition to his newspaper work he has been active in various public movements in Winnipeg, has been president of both the Canadian and Empire clubs there, and regional chairman of the Dominion drama festival, directed the proceedings in Winnipeg last month.

### CANADIANS ATTEND EMPIRE DAY LUNCHEON

Many prominent Canadians in London attended the Empire Day Luncheon given in honour of the Right Hon. Sir Thomas Inskip, Minister of the Co-ordination of Defence. In the picture are two well known to Canadians (left to right), Mr. W. A. MacAdam, acting Agent General for British Columbia, and Mr. Arthur B. Purvis, Montreal.

### GIVEN MANDATE

Premier W. J. Patterson, whose government was returned to power in Saskatchewan.

### Criticizes Government

**Hon. Arthur Meighen Refers To Unemployed Occupying Vancouver Post Office**

Ottawa.—In Vancouver the government is "bending its neck to a sit-down strike" and transferring responsibility from its own shoulders to that of the municipality, Rt. Hon. Arthur Meighen, Conservative leader, said in the senate.

"I suppose if the unemployed took possession of these parliament buildings the government would assume the same attitude and say the matter was up to the municipality," he added.

The senate was considering the government measure providing \$30,000 in Dominion loans to municipalities for self-liquidating public works. The loans must be guaranteed by the provinces.

Mr. Meighen's reference was to the unemployed taking possession of Vancouver post office. The "spineless government" in Ottawa was just sitting down and letting matters go. To think that such a state of things could be started in the property of the people of Canada "was too awful for Canadians to contemplate," he said.

### First Crop Report

**Shows Conditions Are Fairly Satisfactory In Prairie Provinces**

Ottawa.—Crop conditions in the prairie provinces are fairly satisfactory with most of the wheat emerged and coarse grain seeding practically completed. It was stated in the Dominion bureau of statistics telegraphic crop report.

This was the first of a series of seven telegraphic reports covering crop conditions throughout Canada. Included in it is the second of a series of 15 weekly crop reports on conditions in the prairie provinces.

### Unemployed In Britain

**Larger Number Attributed Partly To Registration Of Juveniles**

London.—Latest unemployment figures showed a rise of 31,041 in a month and 382,000 compared with a year ago.

Unemployed at May 16 totalled 1,778,905 with the increase marked in coal and cotton industries. The labor ministry attributed it partly to registration of juveniles who reached the school-leaving age at Easter.

Employed persons totalled 11,375,000, 15,000 below the previous month.

## Destructive Raids On British Ships Continue In Spanish Waters

London.—The British government held a meeting from drastic measures against Spanish insurgents in the hope diplomatic pressure still might check their widespread aerial attacks on merchant shipping. There were increased demands for action and renewed demands from Prime Minister Chamberlain's foreign policy.

Decisions probably depend largely on whether insurgent planes continue their attacks on British ships during the weekend.

Sixty British ships have been attacked and 78 British seamen killed and wounded since the Spanish civil war started nearly two years ago.

(An insurgent aviator bombed the British-owned port of Gandia, in Spanish government territory, and returned to Alicante to sink the British freighter Thorpehaven. Destructive raids on the British freighters Stanray and Isadora in Spanish waters were among attacks reported.)

France fully backs British attempts to find a sure weapon against these losses.

Attacking what he called the "supine attitude" of the government, W. R. Spence, general secretary of the National Union of Seamen, declared many of the organization's 50,000 members were suggesting the shelling of an insurgent Spanish port in reprisal.

This course Germany adopted in bombarding the Spanish government port of Almeria a year ago following the bombing of a German battleship.

"British seamen have been bred in the tradition that sailing under the British flag was a sure protection in every sense," Spence said.

Defenders of the government's caution argued British ships trading with government Spain entered the latter's port at their own risk.

Georges Bonnet, French foreign minister, was reported to have told Sir Eric Phipps, British ambassador in Paris, that France was willing to co-operate with London in "extreme measures" to combat the Mediterranean air pirates who have sunk or damaged at least 15 neutral ships in two weeks.

Sir Eric was believed to have reported to London that M. Bonnet was indignant at the attack on the French freighter Brisbane at Denia in which seven persons were killed and eight wounded.

Britons, too, were shocked by the series of attacks—the machine-gunning of the British freighter Stanray when a lone insurgent plane bombed and destroyed much of the British-owned port of Gandia, wrecking of the British freighter Isadora off Castellon de la Plana, and the attack reported by the Spanish government on an unidentified ship of Spanish registry off Benicassim with a loss of 12 killed and 19 wounded.

## Britain Has Ordered Military Planes From United States Firms

London.—Great Britain's air mission to North America produced its first development when the air ministry announced Britain had ordered 400 military planes from United States and tentative proposals have been formulated to increase production in Canada.

It was understood the purchases in the United States would cost more than £7,000,000 (\$35,000,000) and would be deliverable in two years.

Two hundred planes were ordered from the Lockheed Aircraft Corporation of Burbank, Calif., for general reconnaissance. An order for a similar number for advanced training duties was placed with North American Aviation, Inc., of Inglewood, Calif.

In regard to Canada the official announcement stated "the mission pursued certain discussions with firms in Canada as to the possibility of bringing into being increased capacity in that country for the manufacture of aircraft on a long-range plan. The government have under consideration certain tentative proposals which have been formulated as a result of those discussions."

Informed sources said both reconnaissance and advanced training planes were required "in comparatively small quantities but by certain dates" to speed up the air program. Those contracted for will be outfitted

with machine-guns and bombing equipment.

The announcement brought an attack on the air ministry by Oliver Summons, Conservative member of parliament and head of an aircraft accessories firm.

He declared the present purchases "should not form a precedent, and that in the future such American types as we desire to purchase should be constructed in Canada."

"It should be realized," Mr. Summons said, "that had there not been so complete a failure on the part of the air ministry to plan its supplies of aircraft from home and dominion sources, this unprecedented move would not have been necessary."

"If in the light of the late requirements of the royal air force and our own home production, Sir Kingsley Wood (air secretary) feels that this purchase is essential, many are willing, as I am, to concede him that point, regrettable though for many reasons it may be."

"Overriding other considerations in the whole matter, however, at the moment our first-line strength is half that of Germany, and our monthly production of aircraft is likewise only about one-half of that country's. If the government may be thought, in making this decision, to realize how gravely exercised the country is at this position, then something valuable may have been gained."

### Interest Not Paid

**Britain And France Protest To Berlin Over Austrian Loan**

London.—British and French trustees of 1933-34 loans to Austria lodged a strong protest in Berlin against non-payment of monthly interest instalments due June 1.

Britain, France, Italy and other European countries are guarantors of the capital and interest of the loans, but it is understood Italy did not join the protest.

The Bank for International Settlements at Basel, Switzerland, announced it had protested to Germany against failure to pay interest due on June 1 on a 1930 Austrian government loan for which the bank acts as trustee.

These developments came shortly before Anglo trade and financial discussions are scheduled to be resumed in Berlin on problems arising from Germany's annexation of Austria.

### Close Embassy

**Report Chinese Foreign Office Is To Close At Tokyo**

Hankow, China.—The Chinese foreign office announced that the Chinese embassy at Tokyo would suspend its functions and embassy staff members would return to China.

The spokesman emphasized the move did not mean severance of diplomatic relations with Japan. He said it was prompted by a Japanese use of "underhand methods in disregard of international law to force the withdrawal of Chinese diplomatic and consular representatives."

with machine-guns and bombing equipment.

The announcement brought an attack on the air ministry by Oliver Summons, Conservative member of parliament and head of an aircraft accessories firm.

He declared the present purchases "should not form a precedent, and that in the future such American types as we desire to purchase should be constructed in Canada."

"It should be realized," Mr. Summons said, "that had there not been so complete a failure on the part of the air ministry to plan its supplies of aircraft from home and dominion sources, this unprecedented move would not have been necessary."

### NOTES AND COMMENTS

THIS WEEK'S whirligig includes a few happenings of general interest. Unusual was the assembly on Monday evening of ratepayers to protest against the revised assessment of the school district. Approximately 150 ratepayers were there to state reasons for objecting to increases which they considered out of proportion to actual values or because they felt that taxation was increasing to the point which made it increasingly difficult to meet.

UP UNTIL this year school expenses have been moving upward and there was little complaint. Now it has come to the time when ratepayers' pockets are being more heavily raided and it begins to hurt. They naturally ask why in many instances taxes have increased from 50 to 150 per cent. Explanations are not very clear and the result is that ratepayers protest. Further enlightenment would help to dispel misunderstanding and protest. One thing is certain. Expenses of the school district cannot be permitted to increase. The present attitude of ratepayers demands a reduction in total expenditure. The school trustees have to bear the brunt of the criticism, and the responsibility is trying to them. One good thing is that ratepayers will be awakened to the fact that they have been too careless of their own responsibility in local affairs. Ratepayers annual meetings have been ignored, no guidance has been given to councils or school boards, so that the bulk of ratepayers must acknowledge they too have been negligent.

PERSISTENT effort intelligently applied usually brings results. The Canadian Legion for three years has been endeavoring to raise funds by means of carnivals to erect a club. Their third carnival this week received a good measure of public support, helping to bring them nearer to the goal of their desires. The ideals of the Dominion command of the ex-service men's organization is to safeguard the welfare of those who suffered from war's ravages, and the care of the widows and orphans. It is a gradually diminishing army, for the war ceased almost twenty years ago, so that by this time only one third of the people have actual remembrance of it. The older ones have died, and a new generation has arrived since. Yet there are still many left, and the country cannot overlook its duty to those handicapped by war's ravages.

WE DO not like to talk of ourselves, but at times it becomes necessary to hit back at those who through insidious criticism of our policies think they are doing us harm. We recall that six years ago efforts were being strenuously made by certain reactionary and revolutionary elements in the Crows Nest Pass to institute a boycott against The Journal. It was maligned on street corners and by soap box orators because it staked its business life on fighting the outfit which at that time was endeavoring to secure control of mine workers, town council and school board. What they were going to do to us when they got control isn't worth recalling.

BUT WE DO recall that we told them to do their darnedest; that we would rather go clean broke than ever compromise with them and their policies. The Journal backed and encour-

aged the Citizens League of that time to stand steadfast against the element which would have likely wrecked the coal industry for a considerable time, and mine workers would have suffered from periods of idleness which would have undoubtedly ensued had the subversive element gained control. We have seen the amusing spectacle of people, who at one time applauded the efforts of The Journal, later join in reviling us because again our policies did not coincide with theirs.

WE KNOW full well that serving the public in any capacity is a task which receives little commendation but plenty of abuse. It was ever thus and forever will be, so we have no illusions on that score. What we do claim is that The Journal has consistently stood and worked for the general interests of the community. It has given of its space freely to boost worthwhile community activities, and will continue to do so. Its editorial policy may at times conflict with opinions of its readers, and we suffer or benefit accordingly, but we may as well state without any equivocation that we will not be coerced by threats of boycott or other measures calculated to harm us or our business.

WE WILL shortly observe our eleventh anniversary of commencing business in Coleman. We have shared in the ups and downs of the eleven years during which we have made many friends, and of course, some enemies. We have no regrets if we have made enemies, for we have conducted this paper fearlessly in the interests of the community at large, let the chips fall where they may. It has been a source of satisfaction that we have continued ownership of the paper longer than any of those who struggled to publish a paper since the town started, and we appreciate the loyal support of those who through good and bad times have stayed with us.

THERE IS Beauty, there is romance, and there is ruggedness to fire a man's heart in these mountains. We hope to live here for many years yet, doing the best we can for the town and the promotion of our own business so that it may be of greater usefulness.

THE only credit which is of value to a man in his business dealings is that which he has earned by honest and square dealing with his fellow men. No other credit is of any use to him. There are so many catch-phrases used in regard to credit that many lose sight of the most important fact that a man's personal credit is what really counts.

TURNER VALLEY PRICES MUST BE KEPT NEAR MONTANA LEVEL  
Why the price of Turner Valley crude oil must be kept at a level having a very definite relationship to the price of Montana oil was explained in a memorandum submitted to the Tariff Board of Canada recently by F. G. Cottle, chief auditor of the Alberta Board of Public Utilities Commissioners. The memorandum was as follows:

"Although Montana crude oil cannot compete with Turner Valley crude at Calgary refineries, it can quite definitely compete at refineries in Saskatchewan and Manitoba or at Cootna. This statement is based on the assumption that the price of Turner Valley crude must be low enough to secure the Saskatchewan and Manitoba markets.

"The lower crude prices in Montana result in lower refinery prices of finished products. This means lower refined prices, not only in southern Alberta but, by reason of the basis of the Alberta price structure, over the entire province. Lower refined product prices in Alberta naturally require lower crude prices for Turner Valley, so that crude prices in Montana control the price in Turner Valley independently of the product competition offered by Montana crude in Saskatchewan and Manitoba." ## Steady Employment Brings Contentment

Greater use of Alberta coal brings more employment to Alberta miners. Despite keen competition from other fields outside of Canada, Alberta mines strive to place a superior product on the market and so increase the consumption of Alberta coal.

Railway business is a very important factor in Alberta's steam coal industry.

### "MEN AT WORK!"

The most cheerful sign on the road

★ ★

"MEN AT WORK" is an encouraging, cheerful sign upon the highway.

It is the happiest sign on the business highway too. Business enterprise, making wise use of banking service, is the mainspring of employment.

The contractor responsible for that "Men at Work" sign gets the job of building that stretch of highway by being the lowest responsible tenderer.

*Not always does he have the ready money to buy all the materials, pay wages and build it out of his own resources. He goes to the bank and, having assets and a good reputation, he negotiates such advances as he may need.*

He orders materials, sets men to work. As the job proceeds, engineers' certificates enable him to collect from those with whom he contracted, and the work goes on.

The highway finished, the bank is repaid. Such repayments enable the bank to supply credit to other responsible borrowers.

A manufacturer gets a large order, with an early time limit for delivery. With only a hundred men, his factory cannot turn out the articles within the time required. With more men he can do it—but he lacks sufficient cash.

Operating his factory, as a going concern, with a profitable order and having a reputation for integrity, he asks the bank to lend him what he needs to pay wages.

The bank makes him a loan. He takes on more men. They get wages. The goods are turned out, delivered and paid for. The manufacturer repays the bank with the agreed interest.

He has his profit and can spend some money developing new business to keep his men employed.

How does a bank make these advances—where does the money come from?

Banks, having branches throughout Canada, mobilize the surplus funds of millions of depositors, large and small, and, based upon them, make credit available throughout the country as may be required.

Millions of little sums represent the toil, production and lifetime savings of Canadians—your fellow-citizens.

Safeguarding these deposits is the bank's first care.

Deposits of \$1,000 or less—most of them much less—are owned by 3,770,000 out of Canada's 4,084,000 savings depositors. The total of all bank savings deposits in Canada is nearly \$1,584,000,000; the average savings deposit in a bank is only \$387.

Widely safeguarded by Canada's chartered banks these deposits furnish credit that keeps "men at work" when used by Canadian business and industry—producing new realizable

wealth from Canada's great resources. The country and all its people benefit.

In the field of business deposits, out of an average of 660,000 "current" accounts, 596,000 amount to \$1,000 or less.

Savings deposits are, primarily, the basis on which banks can make loans.

Only the confidence of the people and their willingness to leave their money on deposit, enable a bank to lend money—and at small profit-margin to itself—serve the community.

We have mentioned the contractor and the manufacturer. The same process stimulates employment throughout the whole fabric of production, industry and commerce.

Loans to agriculture and for marketing agricultural products totalled in 1937, \$88,294,000—9.0 per cent. of all ordinary bank loans shown on the return to the Minister of Finance, October 31st, 1937.

Of this sum \$57,490,000 went to farmers, cattlemen and fruit raisers and \$30,804,000 to grain dealers, seed merchants and grain exporters.

Other bank loans went to municipalities and school districts; wholesalers, retailers, manufacturers of and dealers in lumber, pulp and other forest products; fishermen; fish packers and curers; public utilities including transportation companies; stockbrokers and bond dealers; provincial governments; mining men; churches, parishes; hospitals; and to charitable and religious institutions.

Canada's chartered banks defend and protect the safety of the funds of depositors—the millions of thrifty souls we have described, whose life-savings they entrust to their banks.

No Canadian depositor, even through the world-shaking events of recent years, has had to fear for the safety of a single dollar lodged with Canada's chartered banks.

The funds of depositors are their own—not a reservoir from which everybody may draw at will for any and every financial experiment.

### Local News

Miss Daisy Fields, of Macleod, is visiting her brother, Wm. Fields, and Mrs. Fields.

Service at St. Alban's church will be held at 11 a.m. next Sunday. Rev. J. R. Hague, rector.

Thanks to many subscribers who called or remitted subscriptions during the week. Prompt attention is particularly appreciated.

W. H. Chappell, district deputy grand master of District No. 6, attended the annual meeting of the Grand Lodge of Alberta, A. F. & A. M., held last week in Edmonton.

To create interest in any local project, in any business activity, in anything of a community nature, you must have the aid of publicity in The Journal, for it is there the people look for the vitally important news and comment on community activities.

Arthur E. Graham, W.M. of Summit Lodge, A.F. & A.M., and Rod McLeod, of Blairmore Enterprise, representing Rocky Mountain Lodge, Blairmore, attended the provincial grand lodge annual convention at Edmonton.

Remember the church has a claim on your financial support. Without churches a community would develop into an undesirable place in which to live. For the sake of children particularly, as well as adults, the ministrations of the church are essential to civilization.

Chow, popular chef at the Grand Union hotel, found the attraction of Barnes' circus so fascinating that he took a day off and went to Lethbridge last Thursday. He said it was "vellygood," on his return at 5 a.m. on Friday, smiling with satisfaction.

Frank Celli with his smile of optimism and good cheer was in on Monday from Creston, accompanied by Mrs. Celli. He has such a powerful handprint that it is far worse than an electric shock to shake hands with him, but on Monday he must have had rheumatism or some other disability.

F. Waldie of Kimberley and Floyd Celli of Creston have taken over the Palm Confectionery, which since the death of Mr. J. Lysek last November has been carried on by Mrs. Lysek. The building is owned by Mr. Frank Celli, and some years ago he sold the business to Mr. Lysek after operating it himself for some years.

Coleman visitors at Waterton Lakes on Sunday were Mr. and Mrs. S. B. Ryan, Mr. and Mrs. James Kilgannon and daughter, Francis Kilgannon, Bill Jones, Mr. and Mrs. D. Nevay, Miss Nettie Gillespie, John Kanik, Pete Oliva, Mr. and Mrs. Wm. Antel and family.

A shower in honor of Miss Rosie Kulig, bride-elect, was held at the home of Mrs. James Moore on Wednesday, June 8, with twenty guests present. Whist was played, prize winners being Mrs. J. Lloyd, Miss Rosie Kulig and Miss Mamie McLellan. Following a delightful luncheon many beautiful gifts were presented to the bride-elect.

Miss Jennie Farano, 30 years, died on June 12. Besides her parents, she is survived by five sisters and two brothers. Living in Coleman are Mrs. Jean Francesco, Mrs. J. B. Gunderson; Mrs. Mancini, Blairmore, and a sister in Granum. Her parents lived at Hillcrest and Michel before coming to Coleman. The funeral was held at 5 p.m. on Wednesday afternoon, Rev. Father Dunbar officiating at Holy Ghost church.

### WEDDINGS

Jackson - Beech  
Travis - Phillips

The United church manse on Tuesday, May 24, was the scene of a double wedding when Muriel, eldest daughter of Mrs. and the late Thomas Jackson, of Coleman, became the bride of Leslie Beech, only son of Mr. and Mrs. J. Beech, of Natal, B.C. and Miss Josephine Vernon, youngest daughter of Mr. and Mrs. J. Travis, of Natal, B.C., became the bride of William Trevor Phillips, youngest son of Mr. and Mrs. Phillips, of Vancouver, B.C. Rev. J. H. Bevan officiated.

WORLD HAPPENINGS  
BRIEFLY TOLD

A resolution asking that a percentage of vacancies in English schools for anti-aircraft training be reserved for war veterans was passed at the British Legion conference.

Britain, United States and several European countries are expected to send representatives to the international canoe championships to be held in Vaxholm, Sweden, Aug. 6 and 7.

Robert Perkins, airman M.P. for Stroud, England, released a pigeon at Westminster, motored to Heston and flew 100 miles to his home. The pigeon was home first by a minute.

Sir James MacBrien, former commissioner of the Royal Canadian Mounted Police, who died March 5, left an estate of \$35,331, according to his will filed for probate.

United States Congress has been asked to add \$700,000 to the \$2,534,517 already available for control of grasshoppers and other pests as the original amount was not enough.

Eaton Company (Western) Ltd. will construct an \$800,000 departmental store this year in Edmonton, it was announced at Calgary. The tentative plans call for a two-story and basement building.

Sir Edward Denny Bacon, 77, one of the world's foremost stamp authorities and supervisor of the magnificent collection of King George V, died recently at his home in South Croydon.

Establishment of a diploma course in aerial navigation was announced by the University of Toronto. Honor matriculation will be necessary for admission to the two-year course, which begins Oct. 1.

Pensions for former members of parliament and their widows will be provided under a bill the British government is expected to introduce shortly. A pension of £3 (\$15) weekly for ex-members and 30 shillings (\$6) for widows is proposed.

## Outlook Is Promising

Best Prospect Seen For Agriculture In Canada Since 1930

J. S. McLean, president of Canada Packers, Ltd., in an article appearing in a recent issue of the Toronto Stock Exchange Monthly Bulletin, states that, owing to the large British quota for bacon accorded by the Ottawa agreement, hogs are selling at high prices and are netting the producer a large profit. The outlook is that the high price level will be maintained.

"In wheat the prospect of a high price is somewhat less assured. World production will probably be greater than last year. It seems certain United States will have a substantial surplus.

"But the world carryover of hard wheat of the Canadian type was extremely light and a good demand is likely for the Canadian crop, even although that crop is much larger than in recent years.

"As to cattle, the outlook for 1938 is distinctly better than for 1937. On cattle put into the feed lots last fall the farmers have lost money. But recently prices have been firmer. One of the hopes is that in the trade agreement now being negotiated with the United States better terms may be secured for Canadian cattle entering that market.

"On the whole the outlook for agriculture in Canada in 1938 is more promising than for any year since 1930."

## Sigmund Freud

Noted Author, Plans To Make His Home In England

Dr. Sigmund Freud, 82-year-old father of psychoanalysis, who for years has been trying to find out why men kill each other, came to London to make his home. He went into a self-imposed exile from Nazi-fascist Austria to finish a book on the Bible.

Despite his great age, the noted author appeared vigorous and willing to continue his work in a land removed from Austria, where he had lived for 70 years. His tall, slender figure still was upright. His dark, friendly eyes appeared to have lost nothing of their youthful brightness.

Freud arrived at Victoria station with his wife and was greeted by Dr. Ernest Jones, president of the International Psychoanalytical Association. He was driven away in an automobile from one end of the station while his son, Dr. Martin Freud, and a group of newspapermen, photographers and news reel cameramen awaited him at the other end.

Dr. Freud was driven directly to St. John's Wood, where a modern house had been rented for him for a few months while he seeks government permission to remain in England for the remainder of his life.

Kind words are never lost—but they are frequently mislaid.

## Restored To Favor

Story About Regular Hand-Out Customer And A Window Blind

It seems that clergyman's wives have regular customers for handouts of food. And our tale contains a thought for all who ponder on problems of public relations.

A story going around at the moment concerns the Spring house-cleaning, a regular customer and an ordinary window blind. The window blind was one of a dozen or more on a chair in the kitchen porch where a regular customer was given breakfast. The housewife was momentarily absent when the customer departed. An hour later, when the windows were ready, the blinds were sought. One was missing.

The regular on his next visit was told that no more food would be given out because the blind was missing. The regular denied the theft; the lady was adamant. He went breakfasting away. But he was back the next day with the report that he had seen the missing blind in a second-hand store on Queen street and if the lady would give him 15 cents he could buy it for her. He gave her the fifteen cents.

Half an hour later he returned with the blind and thereby regained his former right to one breakfast per week or thereabouts.—Printed Word, Toronto.

## A COOL, BREEZY, YOUNG FROCK

By Anne Adams

Styles may come and styles may go, but the "swinging skirt" frock seems to go on forever... as far as the young set is concerned. It's the very type of dress to make a girl in her teens and twenties feel especially graceful and alluring. Here, in Pattern 4722, Anne Adams has given an exciting lift to the waistline, a piquant to the brief, ruffled sleeves, a soft and flattering treatment to bodice and skirt, that makes this the perfect little frock for summer! The best fabric for it? A dainty airy printed silk, a chiffon, or a printed silk crepe.

Pattern 4722 is available in misses' sizes 12, 14, 16, 18 and 20. Size 16 takes 3 1/2 yards 39 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

## Sounding Rocket

New Style Of Parachute To Bring Rocket Safely Back To Earth

A new art in parachuting has been developed in the desert in New Mexico to bring safely back to earth the great sounding rocket of Prof. H. Goldard of Clark University.

The early rocket ships usually destroyed themselves by falling to the earth after they had ascended a mile or more. This new ship comes down gently with a parachute.

The Goldard rocket is 15 feet long, about a foot in diameter, made of aluminum painted black, and capped with a shining conical head. It weighs only 84 pounds after its flaming oxygen-gasoline tail which drives it up is exhausted. At this point the cap opens and two parachutes come out. A small one carries meteorological instruments sent up with the rocket. A large parachute with a spread of 10 feet is for the rocket's descent.

The speeds which this pioneer rocket ship has developed run up to 700 miles an hour.

## THOUSANDS DROPPED

In answer to a question in the House of Commons, Hon. C. D. Howe (above), Minister of Transport, informed the House that 5,600 C.N.R. employees had been dropped from the payroll during the past six months because of adverse business conditions.

In answer to a question in the House of Commons, Hon. C. D. Howe (above), Minister of Transport, informed the House that 5,600 C.N.R. employees had been dropped from the payroll during the past six months because of adverse business conditions.

## Educational Research

Organization of Canadian Council Will Be Recommended

Organization of a Canadian Council for Educational Research will be recommended to the biennial conference of the Canadian Educational Association in Halifax, August 15, by a five-member committee appointed to study the problem of national research in education in Canada.

It was announced the committee, headed by Dr. H. F. Munro, president of the C.E.A., met in Toronto to draft its recommendations. It was appointed at the biennial conference of the C.E.A. in Regina.

On the proposed research council, it was announced, will be one representative from British Columbia; three from the prairie provinces; four from the Quebec-Ontario area; four from the Maritimes and three co-opted members.

## Not A Dependent

Bachelor Found Income Tax Deduction Not Allowed For Housekeeper

Add income tax additivities: A bachelor in Providence, R.I., who employed a housekeeper, thought he could deduct the \$4 a week he paid her plus the price of a new hat and bed springs he bought her "because she threatened to quit if I didn't."

The U.S. Government ruled the housekeeper was earning her livelihood and couldn't be classed as a dependent under the law.

Discovery of two new seams of rich coal at Bemish, Eng., will provide 20 years' work for 1,000 men and boys.

## "Rubber" Made From Limestone, Coal and Salt

One of the most important materials supplied to us by nature is rubber, sometimes called "Black Gold" because of its great commercial value. First brought to the attention of the civilized world by Columbus, who found the natives of Haiti playing with a rubber ball, this material is now used for literally thousands of purposes and is the basis of an industry which does a billion-dollar business annually.

While hundreds of different trees, weeds and vines contain rubber, none equals in quality and quantity that obtained from the milky juice of the Hevea tree, native to the equatorial jungles of Brazil. In spite of the fact that the Hevea tree is now cultivated in various tropical countries other than Brazil, the market price of rubber sometimes reaches such a level as to disturb the rubber industry and the public as well. In addition, several important industrial nations do not own any land suitable for the production of rubber.

As a result of this situation, chemists throughout the world during the past few years have spent many millions of dollars trying to make synthetic rubber. Although chemists have not yet succeeded in making a commercial manufacture of a product identical with that obtained from the Hevea tree, they have done much better. Using four of nature's own raw materials, limestone, coal, salt and water, they have produced a product known as neoprene which looks like rubber, acts like rubber, and can be used in the manufacture of practically all articles for which rubber is now used.

The chemical story, briefly told, is as follows: Coal and limestone heated together in an electric furnace give calcium carbide, which, on the addition of water, gives acetylene gas. This part of the story is familiar to some of the older boys who used

## Thousand Islands Bridge

International Ceremonies To Be Held On Opening On August 18th

Governor Lehman of New York has accepted an invitation to attend the opening on Aug. 18 of the new Thousand Islands International Bridge.

A delegation composed of Vice-Chairman Frank J. Martin of the Thousand Islands Bridge Authority, State Senator Percy A. Fitzhugh and Assemblyman Russell Wright presented him with the formal invitation, and the Governor said "yes" then and there.

President Roosevelt had conditionally accepted a similar invitation from Prime Minister Mackenzie King of Canada has made full acceptance. Other leading officials of the Federal and Canadian governments, New York State and the Province of Ontario will attend the international ceremonies dedicating the new \$3,000,000 bridge system and celebrating the century of peace and good will between the U.S. and Canada.

Consisting of five separate spans and over eight miles of approach and connecting roadways, the Thousand Islands International Bridge will cross the St. Lawrence river and scenic Thousand Islands from Collins Landing, N.Y., to Ivey Lea, Ont., near Gananoque.

## Good Man For Job

New Commander-In-Chief At Gibraltar Must Be Obedient

General Sir W. Edmund Ironside, who is to succeed General Sir Charles Harrington as Governor and Commander-in-Chief at Gibraltar, is a big man in inches, a stern disciplinarian, a linguist, and has eyes which can make any man quail.

The artillery defences of Gibraltar, seaward and landward, are vital. In the changed Spanish conditions Great Britain needs a first-class artilleryman at "Gib."

General Ironside learnt foreign languages like the famous explorer Burton did. He put down on a post card a list of words every day and memorized them. Thus he built up a vocabulary by short and intense concentration.—News of the World, Lk. 23-46, Jesus died.

## Indian Origin More Likely

Antiochites Come From World Meaning "Where Bears Are Hunted"

Antioch, the island so much discussed at present, was called Asomption by Jacques Cartier when he first sighted it in 1534 and Asomption by a later explorer, but within the next hundred years had become generally known as Antioch, from it, it is said, an Indian word Naticouti, meaning "where bears are hunted." Derivation from Spanish words "before the coast" has been suggested, but the Indian origin is more likely.—Toronto Star.

## SUNDAY SCHOOL LESSON

JUNE 19

## THE SUFFERING SERVANT

Golden Text: For the Son of man also came not to be ministered unto, but to minister, and to give his life a ransom for many. Mark 10:45.

Lesson: Mark 15:22-39.

Devotional reading: Isaiah 53:4-9.

## Explanations And Comments

The crucifixion, Mark 15:22-27. The knoll outside Jerusalem to which Jesus was brought to be crucified is called Golgotha in Greek, Calvary in Latin, words which mean "a skull" for it was skull-shaped. As was customary before a crucifixion, Jesus was given a stupefying drink, wine and myrrh, but he refused it. Then at the third hour of the day they crucified him.

His garments were the prerogatives of the executioners. His headrest, which was placed on the ground, would supply one article for each of the four men. They cast lots to decide which each should have, and also for the seamless inner garment. Above his cross was written, in Hebrew, Latin and Greek, "JESUS OF NAZARETH, THE KING OF THE JEWS." Pilate could not write in Greek, and he considered it an insult to himself to have a Greek inscription written on the cross.

Darkness, Desolation and Death. Mark 15:33-39. From noon till three in the afternoon there was darkness over the land. At the ninth hour Jesus uttered with a loud voice in Aramaic the first sentence of the Twenty-second Psalm, "My God, my God, why hast thou forsaken me?"

"Behold, he calleth Elijah," was what some bystander said. There could have been no Elijah to appear to rescue men in peril. "No Jew," said the name of Elijah, exclaims Dr. Ederheim, "nor yet misinterpreted as a quick reference to the prophet of the Old Testament."

Some men ran and held up to Jesus' mouth a sponge fastened to the end of a reed and filled with sour wine. The customary drink of the Roman soldiers. This was in answer to Jesus' words in Psalm 22:1 as he said, "I thirst."

"Allow me to give him drink," the man said to those near: "let us see whether he will cometh to him down." He seems to think that if Jesus' life were prolonged, then Elijah would be given sufficient time to come, if he would.

Crying with loud voice, "Father, into thy hands I commend my spirit," Lk. 23:46, Jesus died.

The veil of the temple was rent. Matthew reports an earthquake. The veil was hung between the Holy of Holies and the Holy Place, and could only be opened by the High Priest, and that only once a year which was on the day of Atonement. "It is a picture of atonement, of access to God by 'his' and 'living way'."

The demand of the Divine Sufferer greatly impressed the century. It was the death of no human prophet, but of the Son of God. The darkness, the trembling earth, that shout of triumph, the universal cry of "He is dead," all speak of a voluntary death, all conspire to make thoughtful witness in the exclamation, "Truly this man was the Son of God." (C. R. Erdman).

## Fulfilled Early Promise

Sir Joseph Thomson One Child Prodigy Who Made Good

Youthful prodigies do not always bear out their early promise, but that certainly cannot be said of Sir J. Thomson, Master of Trinity College, Cambridge, to whom the coveted Kelvin Medal has been awarded for his eminent services to engineering science.

Sir Joseph entered Owens College, Manchester, at the age of 14, to take the engineering course. The event caused such a stir that the age limit was immediately raised!

But the boy quickly proved his worth, and since then 20 universities have presented him with degrees, 11 learned societies with fellowships, nine others with medals.

He was one of the original holders of the Order of Merit, and he won the Nobel Prize for Physics 32 years ago—a record of distinction that is probably unique. —News of the World.

## Has Plenty Of Cheese

Germany Urges People To Eat More And Keep Well

"Eat cheese and keep well" the German Government suggested with small effects. Floats loaded with cheeses from the most pungent limburger to the mildest cream would their odoriferous way through Berlin streets, and the streets with the "eat cheese" banners. Cheese is one of the few things of which there is a glut on the German market.

Julius Caesar was very punctilious in regard to the management of his household, and once put his baker in irons for serving him with one kind of bread and his guests with another. These are times when a man needs a new hat but does without it. However, it's different with his wife.

James Bay is about 230 miles from north to south and about 140 miles from east to west. 2259

## Eskimos Make Long Trip

Accompany Priest From Chesterfield Inlet To Quebec Congress

After travelling more than 1,950 miles by dog train and railway, three Eskimos from the oblique station at Chesterfield Inlet reached Montreal on the Continental Limited of the Canadian National Railways, on their way to Quebec, delegates to the Eucharistic Congress. They were accompanied by Rev. Father L. Ducharme, O.M.I., the eldest of the group is Alphons Kollitser, 35, who bears his name "The Fat One." John Ayayur (Strong Pusher) is 27. He supplies the missionaries with caribou meat, while the third Eskimo, when he is at home in the Arctic, and on the 450-mile journey on the ice along the shore of Hudson Bay he hunted seals to feed the 19 dogs that carried the party to the first stage of its long trip to civilization. The third party is Simon, John's little seven-year-old son.

Speaking neither English nor French, the Eskimos gave their impressions of their rail journey and their part of the world through Father Ducharme, who speaks their tongue fluently. What surprised them most, they said, was the size of the buildings and the trees and their journey in the train, never having seen an engine bigger than an outboard motor, they were amazed by the great locomotive and appreciated the opportunity given them by the train crew to visit the engineer's cab. They described their births as "moving igloos."

Given their first taste of ice cream in the diner, Simon asked "why is it cold?" You can have things hot here, can't you?" When hot tea followed the ice cream, the Eskimos laughed and said the weird logic of the white man.

On their arrival in Montreal, they attended mass in the Bishop's private chapel and were not at all surprised to hear chants in the Eskimo language on phonograph records.

The memorable journey began on April 28. The train was boarded at Churchill. The Eskimos will return to the Arctic by boat in July.

## Seemed Sensible Idea

Candidate Had His Own Way Of Using Campaign Funds

A political office in a small American town was vacant. The office paid \$500 a year, and there was keen competition for it. One of the candidates, Ezekiel Eickel, was a fellow and a neat campaign fund was turned over to him. To the astonishment of all, however, he was defeated.

"I can't account for it," said one of the leaders of Hicks' party gloomily. "With that money we should have won. How did you lay it out, Ezekiel?"

"Well," said Ezekiel, "you see that office pays only \$500 a year salary, and I didn't see any sense in paying \$1,200 out to get the office. So I bought a little farm instead."

## Jamaica Starts Big Task

Will Spend \$2,500,000 On "Back To Land" Scheme

Acting Governor C. C. Wooley of Jamaica, has announced the island's government would embark immediately upon a \$2,500,000 (\$2,500,000) "back to the land" scheme as a step toward saving the colony's unemployment problem.

A special department with an experienced staff would be set up to devote its attention to the task. Land would be bought by the government and sold to the people on easy terms. Agricultural implements, seeds, roads and stock would be provided and the services of expert agriculturists would be available, he said.

Although great ice sheets now exist only in the polar regions, the earth is still in an Ice Age, since some six million square miles are blanketed in ice.

## WHAT HO!

—By—  
**RICHARD CONNELL**  
By Arrangement With Thomas Allen, Publisher, Toronto.

### CHAPTER XIII.

Fate, in the form of a bus, made up Ernest Bingley's mind for him. It stopped in front of him and he swung aboard it. Whither it was bound he knew not. One of the compensations of poverty is that adventure is not the exclusive prerogative of the rich.

"Where to, sir?" asked the guard. "I'm going wherever you're going," answered Ernest. The guard gave him an alarmed look, and a tenpenny ticket, and scuttled away.

At the end of the run Ernest got off. Confronting him was a massive structure, which, a bobby informed him, was the Bank of England. Ernest was wastefully inspecting the exterior of this monument to Mammon, when Sir Peter Tyler, a most substantial and resplendent figure, issued forth.

"Bingley, by Jove," he exclaimed. "What a bit of luck. Glad to see you."

"How do you do, Sir Peter," said Ernest.

"Splendidly, thanks. I rather thought you'd be in town to-day."

"You did?" said a surprised Ernest.

"One finds beer where money is," said Sir Peter, and winked. "Shall we go in my car or yours?"

"Yours," said Ernest. "A free ride was a free ride, and Sir Peter was Sir Peter."

They entered a limousine like a fancy horse.

"Club, Willets," ordered the financier.

They were ferried through the Strand's traffic and delivered at the door of a marble temple in Pall Mall.

Sir Peter talked of his golf game, en route. Ernest lolled on the cushions and listened though he did not know a brassie from a bledie.

In the impressive lobby of the club a door-mat rigged out in the dress uniform of a field marshal in Albanian dragons, said:

"They are waiting for you in the private dining room on the third floor, Sir Peter."

"Good," said Sir Peter. Then, to Ernest, as they rose in the lift, "Too bad our friend cannot be with us. Passport trouble, I believe."

This was so much pure Erse to Ernest.

But had no chance to ask questions because things began to happen, and happen fast.

Sir Peter steered him into a room where three men were smoking and drinking coffee as if they were holding a wake over the remains of a luncheon. They were men in their middle years, well-turned-out, important looking men.

They greeted Sir Peter as if he were an old acquaintance.

"Permit me to introduce Mr. Ernest Bingley from America," said Sir Peter. "You've heard me speak of him, I think. Mr. Bingley, this is Dr. Hendrik Van Tromp—the Dutch group, you know."

Dr. Van Tromp, who looked like a Dutch group, having a figure like a

pile of bolsters, made a quasi-military salute.

"Mr. Silver,"

Mr. Silver, who looked as if he should have been called Mr. Leather for he was tanned as a saddle, and looked as tough as a check-rein, said he was honored.

"And Sir Mark Newsome."

Sir Mark, whose spike of ebony beard and anthracite eyes suggested a hypnotist, said:

"Most awfully glad to meet you at last, Mr. Bingley."

Ernest made suitable-civil sounds, and awaited.

The four men, he was aware, were scrutinizing him closely. The thought struck Ernest that this might be a commission of alienists assigned to ascertain if his being at large constituted a threat to the peace of the kingdom. He crossed his legs and made ready to have his knee-jerks tested.

Sir Peter addressed the meeting. "Gentlemen," he said, "I suggest we cut this short. I've a pressing engagement, and when I tell you that it involves a niblick and a caddie, you will see why we should waste no time."

"Also, I have a golf game," said Dr. Van Tromp.

"And I," said Miles Silver.

"Booked to fly to Biarritz this afternoon myself," said Sir Mark Newsome.

"Let's get down to it, then," said Sir Peter.

Ernest thought it rather cool of them to run him through the hopper in a hurry so they could get away to play; but he said nothing, and decided to adopt a policy of silence and thus avoid any verbal traps they might set for him.

"We all know what we are here for," said Sir Peter.

"And we have a pretty good idea of what Mr. Bingley is here for," said Sir Peter, and his smile, somehow, made Ernest think of a tom-cat he had once caught raiding the canary department of his pet-shop.

Ernest sat back wearing the sage and solemn look of a mortician. A nugget of wisdom from his reading came back to him—that dictum of some early statesman—"when in doubt, keep your mouth shut and your eyes open and look wise."

"Are there any questions you'd like to ask, Mr. Bingley?" said Sir Peter. Ernest made a barely visible, negative shake of his head.

"Mr. Bingley," said Sir Peter to the others, "always makes a careful and thorough study of anything before he commits himself. Am I not right, Mr. Bingley?"

Ernest nodded.

"To our muttons, then," said Sir Peter. "We'll hear first from the gentleman from Rotterdam. What do you say, Dr. Van Tromp?"

"One," said Dr. Van Tromp, just that, nothing more.

Sir Peter looked pained. He pointed at Mr. Silver.

"Two," said Mr. Silver.

"Three," said Sir Mark Newsome, and blew a smoke-ring.

They all eyed Ernest expectantly. They saw a face as wooden and expressionless as a hickory two-by-four.

"Well, Mr. Bingley, will you say 'four'?" said Sir Peter in a satiny voice.

Ernest maintained a stolid silence.

"Mr. Bingley," cooed Sir Peter, "do say 'four'. Will you?"

Ernest nodded. He did not see how any harm could come to him for being polite and playing this game, whatever it was. It might be a mental test, he reasoned, though the theory that it was an English version of the match game business men play to see who will pay for the lunch, occurred to Ernest.

It was Dr. Van Tromp's turn next, and after a moment of deep-thought reflection he said:

"Four and a quarter."

"Four and a half," said Mr. Silver.

"Four and three quarters," said Sir Mark.

They waited for Ernest's move.

"It's up to you, Mr. Bingley," Sir Peter said. "I expect you to say 'five', you know."

Ernest did not say it.

"Am I to understand that you say 'five'?" asked Sir Peter.

Ernest nodded.

"Five it is, then," said Sir Peter, and seemed pleased. "What do you say, Dr. Van Tromp?"

"Nudding," said Van Tromp.

"Can you better five, Silver?"

Mr. Silver said he could not.

"How about you, Sir Mark?"

"I'm most excruciatingly sorry," said Sir Mark, "but five beats my best. Mr. Bingley has too much artillery on his side. I lower my boom to our friend from across the Atlantic."

"That," said Sir Peter, with a satisfied air, "just about winds up the old clock, I think. Unless," he added, "one of you gentlemen wishes to lock horns with Mr. Bingley."

To Ernest's relief nobody seemed to want to lock horns with him.

**Every 10c Packet of WILSON'S FLY PADS**

**10c WHY PAY MORE**

Best of all fly killers. Clean, quick, sure, cheap. Ask your Drug-gist, Grocer or General Store.

THE WILSON FLY PAD CO., HAMILTON, ONT.

"You win, Mr. Bingley," Sir Peter said, and shook his hand. "You've made no mistake, believe me."

The others also shook Ernest's hand, and did not seem much chagrined over their defeat. He tucked his cloak of silence tighter about him and waited for the prize.

"I must dash along now," Sir Peter said. "Sorry to seem so cavalier, but golf is golf, what? You don't really need me. Just drop into my office, Tyler House, Lombard street, and my junior partner, Mr. Armstrong, will take care of you. He knows the details and I'll phone him to be expecting you."

Ernest nodded, cheered by the thought that he was about to escape with his nine shillings and his pocket of pudding intact. He sensed now that this was no innocent game, but some complicated, mysterious commercial maneuver in which they had made him, for reasons known to them, a pawn.

The four important looking men were filing out of the room and Ernest was filing out with them, when their exodus was stopped by a man who burst into the room as if his shirt-tails were on fire.

It was Hubert Punder and to say Mr. Punder was hot is to say that molten lava is like chocolate ice cream. Mr. Punder generated heat in every direction.

"Hah!" he moaned. "Hah!"

"Why, Punder?" exclaimed Sir Peter. "What do you mean by breaking into a private meeting and giving 'Hah' at us?"

"Private meeting? Hah! Private swindle!" bellowed Punder.

"Watch your words, Punder," rapped out Sir Peter.

"I'd like to know what's happened here," Punder said.

"Ask Mr. Bingley."

"Hah!" said Punder, turning a venomous glare on Ernest. "Have you closed with these wolves?"

"He has," said Sir Peter, "and a little less of that wolf talk, if you don't mind."

"How much?" growled Punder.

Sir Mark answered for Ernest, "Five," he said.

"Hah!" It was an outraged "Hah!"

"If 'Hah' is all you have to say, we'll adjourn the meeting," said Sir Peter.

"No, you won't," said Punder. "I got plenty to say. I know your little game. I got spies, too. Trying to juggle me out of P.P.P., hey?"

"I was not aware you wanted P.P.P.," averred Sir Peter.

"You thought nobody wanted it," said Punder. "You knew that without reorganization and a lot of fresh capital it was going on the rocks—so you and these three beauties

### GERMAN YOUTHS IDOLIZE BRITISH SOCCER STAR

When Cliff Bastin arrived in Berlin with the British soccer team he was bombarded on all sides by enthusiastic young German soccer hunters. In the picture he is autographing one of his own photographs which a German youth had in his possession.

bailed your hooks—and went fishing. Well, you caught a fine founder, I must say."

It was entirely clear to Ernest that he was the founder.

(To Be Continued)

### Things We Value

Are Those Which Have Cost Many Sacrifices To Attain

It seems to be a favorite form of advertising to urge that a certain article can be paid for without some pet luxury. How often we read that a set of books can be purchased for the price of two good cigars a day; that a bicycle can be paid for in the saving of car tickets.

The idea is to appeal to the economic impulse that every man has more or less in his make-up.

And what articles are prized more than those for which it is necessary to make some sacrifice? The husband and wife who have saved for a home little by little, and who have found it necessary to drop pleasures and extras that they had been accustomed to, will prize the place much more than if some rich aunt had died and willed them the property.

The young man who saves his first hundred dollars from his earnings will never forget the day when he saw three figures on the sunny side of his bank book.

When advertisers appeal to that instinct in human nature, they are on legitimate and safe ground. The things we value most highly in life are the ones that have cost something to attain.—Guelph Mercury.

### Write Long Letters

Laborers on Malay Estates Use Special Lightweight Paper

Native Indian laborers working on estates in Malay write such long letters home that a special lightweight paper has had to be manufactured for them.

Need for such paper was caused by the introduction of the Empire air mail system. The estate workers did not fully understand the weight restrictions and merely continued to send page upon page home to India, where their relations had to pay additional postage. The relations objected.

Estate employers solved the problem for their workmen. They ordered from London large quantities of a specially made flimsy paper, which they distributed free among the laborers.

And since 11 sheets of this paper can be crammed into an envelope without going over the half-ounce-for-a-penny-halfpenny limit, the Indian workers in Malay can now get ahead with their writing. But even they are probably not as grateful as their wives and parents back in India.

During the many months of its run in the United States, a certain terrifying motion picture caused an average of 28 persons a week to faint or go into hysterical collapse.

Although the stratosphere is only about 10 miles above the earth, and less as we travel toward the poles, an aeroplane must travel a much longer route to reach it.

Scientists now estimate the age of the ocean at from 500,000,000 to 700,000,000 years.

## BUY an extra package and TRY the cooking recipe

There's a fascinating recipe on every box! You'll be surprised how delicious Christie's crisp, wholesome Graham Waters are, made into light, fluffy pancakes and other tempting, tasty things. It's quite a handy idea, too... always have an extra box ready.

## Christie's Biscuits

"There's a Christie Biscuit for every taste"

### The British Navy

520,000 Tons Of Warships Now Under Construction

Great Britain, strengthening her vast navy in its greatest peace-time expansion, has 520,000 tons of warships under construction at dockyards and private yards, including five battleships, 17 cruisers, 19 submarines, 30 destroyers and numerous smaller craft.

The admiralty has launched a three-point plan which, it believes, would keep principal trade routes to this country open in any emergency.

In a speech at Liverpool Geoffrey Shakespeare, parliamentary secretary to the admiralty, told an audience the plan called for:

Special naval convoys for main trade routes;

Conversion of old cruisers into anti-aircraft vessels;

Strengthening the navy's destroyer arm.

The admiralty, he said, believed that on the outbreak of any hostilities it could keep trade routes open and protect shipping bound for the United Kingdom with food and raw materials by a method of routing, convoy and escort.

The secretary attacked critics who claimed strength in the air was a more vital factor in safety than strength at sea. He said experience in recent wars had shown that air power by itself is not likely to win a war.

"Airplanes are fast but they are not self-contained, and it may take weeks and months for the necessary equipment, stores, ammunition and ground staffs to be taken to the bases overseas; whereas ships are self-contained and can go anywhere and stay anywhere," he said.

### Earth Is To Blame

Astronomer Says Moon Has Jumped Its Beaten Track

The moon, Astronomer Harold Spencer Jones said, has jumped its track. "And it's all the earth's fault," the astronomer told a meeting of the Royal Observatory of Greenwich.

The moon's course is plotted by the earth's time and the earth's time is reckoned by its rotation. Mr. Jones explained. Somewhere an unknown gigantic brake has suddenly been clamped on the spinning world, slowing it down, he said.

Dr. Martin Davidson, president of the British astronomical association, outlining this slowing down process was going on at the rate of about 1-100th second every century.

At present, he said, the moon is about six seconds off time off its beaten track.

### Dependable Mail Carrier

Postal authorities of North Tower, Maine, know that the mail will go through when Mrs. Hazen E. McAlister, mother of five children, sets out daily on a 14-mile round trip rural free delivery route. For five years she has delivered the mail in storm and flood without missing one day.

Bobby (short of money): "Say, Dad, have you any work you'd like me to do?"

Father (taken by surprise): "Why—no—but—"

Bobby: "Then how about putting me on relief."

It took Walter Hunt of New York just three hours to think up the safety pin, make a model of it and dispose of his patent rights for \$400. But he'd have made a fortune if he hadn't sold out.

A Babylonian king of the eighth century B.C. had a herb garden in which he grew about 70 kinds of plants.

Poland, we read, is joining in the search for a peace formula. How about the Golden Rule?

### Fought Chinese Bandits

Missionary Found Athletic Training Stood Him in Good Stead

Stirring tale of battles with Chinese bandits were related by Rev. Father J. McDonald, who was in Toronto on his way to Windsor, N.S., on furlough after eight years as a missionary in Lichiu, Chekiang province. Father McDonald is the son of a Windsor girl of police and a graduate of St. Francis Xavier, where he played football and boxed.

Father McDonald's athletic experience came in handy at his mission post. He said that the father of a little girl at Lichiu sold her to another old man for \$200 and she was to become the wife of the son of the purchaser, but when she grew up she didn't want to marry the man. Since she had become a Christian, Father McDonald advised her not to go through with the bargain that started the trouble.

Brigands turned up at the home of the girl's father, where the missionary was staying at the time, and Father McDonald had an idea they were after him. "No doubt that's the reason I put up such a battle," he said.

The missionary led other men of the household in a hand-to-hand struggle with the invaders, and after the fracas was over the bandits fled to the hills, carrying their wounded.

### Germ Warfare

Says Noxious Germs Will Not Be Used In Future Wars

Noxious germs will not be scattered from the skies in a future war, according to Wing-Commander E. J. Hodsoil, inspector-general of air raid precautions. Bacteriological warfare is impossible, he told a meeting of sanitary inspectors in London. It was not feasible to drop "bugs" from the air.

"They do not take very kindly to being compressed and thrown about," said Commander Hodsoil. "It would be necessary to introduce the bug into the system, and short of supplying each of them with a small knife to make a hole when he arrived, it could not be done."

### Overlooked The Soup

Famous Pianist's Chef Wanted All Of His Food Praised

Paderewski's chef always accompanied him on his concert tours, and like all good cooks he thrived on praise. Paderewski said that he got it, too. Once, after a special luncheon had been served to a party of the pianist's friends, Paderewski sent his compliments to the chef with a message that the fish was marvelous, the entree superb, and the dessert unsurpassable. Back came the messenger, saying:

"The chef says that the soup was good, too."

In the presence of moisture, cracks in concrete heal so tightly that the concrete may be stronger than before.

A motor for bicycles to be connected directly to the front sprocket has been patented.

Aberhart, Dec. 23, 1935: "I want to show all and sundry that I can introduce Social Credit, once the proper foundations are laid. You people must be patient and quit this confounded

drumming. You are whining like undeveloped young children." Blairmore field sports on July 1st are advertised by means of attractive posters giving details of the program.

## Local News

Miss Mary Atkinson arrived on Monday night from Victoria, B.C., on holidays from the Royal Jubilee hospital, where she is a nurse-in-training. Mr. and Mrs. Joe Lipovski, of the Coleman Hotel, are visiting relatives near Edmonton this week.

Mr. and Mrs. H. C. McBurney motored to Banff this week to attend the convention of the Rexall Drug Co. representatives.

Mr. and Mrs. Frank C. Creagan, of Medicine Hat, are visiting friends here for a few days and plan on spending the week end at Waterton. Frank is a former president of Coleman Canadians and took an active part in various community affairs when he was a member of the bank staff here.

Ten ladies breezed into the Grand Union hotel on Tuesday evening, not looking for their husbands in the liquid refreshment department, but into the dining room, where they partook of a delicious turkey supper. It was the wind-up of their season's bridge club, and they dispensed their winnings in a wild orgy of feasting on the good menu provided by the chef of the hotel.

St. Hopkins and his old-time CFCN orchestra have been engaged by a local committee to appear at the community hall for a dance on Monday, June 27. This orchestra is considered one of the finest in the province and has been heard each Thursday evening for many years over radio station CFCN. Old time dance lovers will have the opportunity of stepping high, wide and handsome in their favorite dances. Modern dances will be interspersed with the old.

Word was received by Mr. and Mrs. W. J. Bartlett on Tuesday night of the death of Mrs. Bartlett's father, Mr. William Fenwick, which occurred that evening at Crossfield. Mr. Fenwick was about 75 years of age, and is survived by his wife, two sons, Arthur and Harry Fenwick, of Crossfield, and two daughters, Mrs. A. Hughes, of Calgary, and Mrs. Bartlett, of Blairmore. Deceased was an old-time farmer of the Crossfield district, coming out from England many years ago. The remains will be laid to rest at Crossfield this afternoon.

**COLEMAN HOMING SOCIETY**  
Ladies' race from Edmonton, June 12th. With four ladies' prizes being donated, the Coleman men traveled over their birds to the ladies with "do your stuff" orders. In every way the ladies had control of the situation. The weather was the most ideal flying weather this year, and the birds rose to the occasion by doing the Edmonton flight a half hour faster than their previous best time.

Apparently knowing he was flying for the ladies, a male bird was first to be clocked. Maybe he felt sorry for the men of the club and figured he would show that the males still had something to say in the race. Liberated at 6.45 a.m., they were clocked in Coleman as follows:  
1st—Mrs. F. Beddington, 2:45.50 p.m.  
2nd—Mrs. A. Zur, 2:50.48 p.m.  
3rd—Mrs. A. Bigan, 2:52.32 p.m.  
4th—Mrs. J. Hurkot, 2:48.08 p.m.

Prizes were donated by S. Pietras (Blairmore), F. Abousaffy, C. Nicholas and Coleman Cafe. It is not known as yet if there will be a race this week, or if the birds will be kept home. Fly in competition with Calgary, Drumheller, Lethbridge and Cranbrook on June 24th.—F.B.

## COLEMAN MINERS' ASSOCIATION ELECTION OF OFFICERS

President, Bert Garrett; vice-president, J. Lonsbury; secretary, E. Houghton. International Pit Committee—W. Lees, A. Phillips, Jr.; R. McLeod, T. McCloy. McGillivray Pit Committee—W. Chapman, E. Houghton, W. Williams, T. Goldring.

International Hospital Board—J. Nash, Ed. Woods, W. Hayson. McGillivray Hospital Board—G. Ford, J. T. Griffiths, W. Williams, T. Goldring.

Auditors—W. Williams, D. Holly. **KIMBERLEY DEFEAT MICHEL IN CHALLENGE CUP SERIES**

At Kimberley on Sunday, Michel lost a heart-breaking game to Kimberley eleven by a 4-3 score, in the first round of the Challenge trophy, a Dominion wide competition. Michel proved the stronger team during the first part of the game and soon took a 2-0 lead, Jimmy Jenkins missing a penalty kick on a possible third goal. Kimberley scored with only seconds to go in the first half. Condition told in the second half and Kimberley did everything but score. Michel substituted two of their players in an attempt to hold their one goal lead. Kimberley finally drew level with only a few minutes to go and in the over time scored two more goals against Michel's one to gain a 4-3 edge.

By their victory Kimberley will travel to Lethbridge on Saturday, June 18, to oppose the Lethbridge representatives, who will be chosen from among the four teams playing in the city league. Time of kick-off will probably be published in the Lethbridge Herald.

Interest in local hockey pepped up a little over the week with the arrival of two new players and the spread of wild rumors that this player and the next were coming to Coleman.

One rumor which gained credence was that about Bill Brunetti, of Kimberley. Brunetti, while giving serious thought to the position of playing coach to the local team, is at present enjoying steady work, a good position and a good wage. Of more importance is the fact that, towards the end of this month, Bill will be walking down the aisle with a beautiful young Kimberley Miss, and upon her may rest the decision of whether Brunetti takes the Coleman position or stays in Kimberley.

(Continued from Page 1)

and had enjoyed his association during the intervening years. The social evenings spent would live long in his memory. He still retained the society's first membership card and would carry it with him wherever he went.

Following Mr. Larke's response the gathering sang "Will Ye No Come Back Again" and "For They Are Jolly Good Fellows."

Dancing followed until midnight, being enjoyed by all.

## Nazarene Mission

The Nazarene Mission is conducting tent meetings every night this week at 7.30 p.m. in the gospel tent on Main Street east. The evangelist for the next week will be Rev. Edward Lawlor of Picture Butte. Rev. Lawlor is one of the finest and most loved evangelists in Canada in the Nazarene church. His services are constantly in demand. He is a fiery apostle of the old-fashioned gospel truths. He is a very enthusiastic speaker, and his messages are always original and appealing to all ages. To-night his subject will be "A World Gone Mad." Friday night, "Sure Young People Have Changed," Saturday night, his subject will be "America's Public Enemy No. 1. Is It The Levine or Mattson Kidnapper?" Sunday at noon, he will speak on "We Go to Church in a Field" and at 7.30 p.m. "They Almost Starved to Death."

The special singer for the campaign will be Elizabeth Nelson of Regina, who is now the assistant to the pastor of the Calgary Nazarene church as well as the musical director there. Miss Nelson has unusual strong soprano voice, and plays a number of instruments.

The public is cordially invited to all these services in the tent.

## In Memoriam

In Loving Memory of our dear husband and father, Jean Francois Spiller, who died June 16, 1937. The blow was great, the shock severe. We little thought his death so near. We little thought that have lost can tell The sorrow of parting without farewell.

—Ever remembered by his wife and family.

Fred Founds of the Bank of Commerce staff, is on two weeks holiday and is being relieved by A. W. Kennedy of Warner. Mr. Nurcombe will follow with two weeks holiday.

Crows' Nest Pass Motors received a carload of Chevrolet cars last week for sale in the Pass towns.
